Camera: **Canon EOS 5D Mark III: E53**

Film: **Full frame digital**

**Subject:**

U3A project - "Something Old"

**Notes:**

These are the evening shots taken in a panic on the Monday. I sat a Yucca plant in the chair to set the focus. I mostly used a high  $f$  number (11 and above) to maximise the depth of field but I tried some wide aperture shots too although there was insufficient time to evaluate the results during the session. It was guesswork, like working with film again. I took the same approach with the lighting using primarily an Aladdin oil lamp but adding a standard light behind the subject, again with review being delayed until developing the raw images.

The smoking jacket was made to measure for me in India and ordered on line. Unfortunately I rather skimped on the width of the sleeves, underestimating the size of me biceps.

The thinking cap is Nepalese and likewise ordered on line.
